SERGIU IACHIM

Cover Letter

To whom it may concern,

As an experienced financial risk management professional, I am honored to apply for the position of Governor of the National Bank of Moldova. Accordingly, I express my desire to fully consecrate myself to accomplishing the mission of the National Bank of Moldova in the most efficient way.

My professional experience acquired while working especially in international financial institutions as former Fortis Group and Crédit Agricole, combined with international educational background, as well as my cultural awareness gained through traveling and living abroad contributed to the formation and enhancement of my professional skills and competencies panel required for this position.

Certainly, during my journey at former Fortis I started as a Financial Officer position working in the institutional credit department analyzing the profitability and risk associated to this business line. As a Risk Manager at Ageas (former Fortis), I interacted with banking and insurance entities within the group and had the task to monitor and consolidate financial risks. Since 2009 at Ageas I was primarily responsible for insurance risk consolidation at group level. In 2012-2013 I went through an excellent experience pursuing an MBA programme which developed not only my management skills but also the big-picture thinking ability. During my experience in the chemical sector I collaborated mainly with people with non-financial background which was a great apprenticeship in terms of my overall development. In 2014 I returned to financial sector working on ameliorating the risk monitoring model for a bank. At the end of 2015, after my sabbatical leave (parenting), I started an actuarial mission as an external consultant at Crédit Agricole.

The ability to find solutions and adapt to various work-context situations along with some essential soft skills like flexibility, analytical approach, successful communication, effective team work spirit represent key assets of my professional and educational background.

Given my broad experience, high level education and personality traits, I am confident taking over high responsibilities at the National Bank of Moldova in order to create substantial added value for the entire community.

Thanks in advance for your time and consideration. I look forward to hearing from you soon.

Sincerely,

Sergiu Iachim
